UK Neutron and Muon Science and User Meeting 2026

13 – 15 April 2026

Warwick Conference Centre

Science and Technology Facilities Council

ISIS Neutron and Muon Source

UK Neutron Scattering Group

NEUTRONS FOR SOCIETY

Welcome to the UK Neutron and Muon Science and User Meeting 2026!

We are very pleased to welcome over 300 UK Neutron and Muon users to Warwick for this year's UK Neutron and Muon Science and User Meeting (NMSUM).

NMSUM is an opportunity to hear about the latest science from the ISIS Neutron and Muon Source and the Institut Laue Langevin (ILL), as well as updates from the facilities and other matters of interest to the neutron and muon user community.

The meeting comprises a dedicated student day, a science day and a user meeting, similar to the format of previous meetings. We are very grateful to members of the IoP/RSC Neutron Scattering Group for compiling the science programme.

We hope that you enjoy the meeting, and we look forward to seeing you at Warwick!

Contents of this pack

Overview of the meeting	2
Meeting programme	3 – 6
Practical information	7-9
Map of the University of Warwick campus	10
News and information from ISIS and ILL	11
Poster list	12-17

Overview of the meeting

Monday 13th April: Student Day (Scarman House)

A chance for students who are using neutrons or muons in their projects to meet other students, learn more about neutron and muon techniques and present their work.

Tuesday 14th April: Science Day (The Slate and Scarman House)

Plenary talks together with parallel sessions based around five themes.
A chance to hear latest results from members of the community.

- Energy and functional materials
- Magnetism and superconductivity
- Biosciences and soft matter
- Molecular systems and catalysis
- Engineering, imaging and cultural heritage

Followed by a poster session.

Wednesday 15th April: User Meeting (The Slate)

Updates from ISIS, ILL and ESS, discussion, and student poster prizes (morning).

Meeting Programme

Monday 13 April - Student Day (for UK PhD students using neutrons or muons in their research)

Tiered Lecture Theatre, Scarman

10:00	**Registration - reception area at Scarman**
10.30	**Welcome and overview**
	Session 1. Chair: George Phillips
11.00	Crystallography – *Jing Ming*
11.20	Crystallography Science talk – *Kirstin Wilson, ILL, "In Situ and PDF Neutron Diffraction for the Advanced Structural Analysis of MOF Catalysts for Carbon Dioxide Valorisation"*
11.40	Muons – *Alex Louat*
12:00	Muons Science Talk – *Tom Brogan, University of Birmingham, "Revisiting the muon response in $YbBO_3$"*
13:00	Lunch – Lakeview Restaurant, Scarman
	Session 2. Chair: Rakin Gilani
13:30	Excitations and Polarisation – *George Wood*
13:50	Excitations and Polarisation Science talk – *Lewis Giannelli, University of Glasgow / ILL, "Magnetic ground state and excitations in the S=1/2 kagome Heisenberg magnet Averievite."*
14:10	Spectroscopy - *Sam Lambrick*
14:30	Spectroscopy Science Talk – *Tahlia Palmer, University of Birmingham, "Understanding the role of temperature in impact sensitivity of energetic materials"*
14:50	Short Break
	Session 3. Chair: Josie Binks
15:10	SANS – *Lauren Matthews*
15:30	SANS Science Talk – *Sujaya Shrestha, STFC, "Practical Tips for Small-Angle Scattering Data Analysis: Insights from SasView Development*
15:50	Reflectometry – *Oleksandr Tomchuk*
16:10	Reflectometry Science Talk – *Manmeet Kaur Sodhi, ILL, "Multi scale Mechanics of Microgel-Stabilized Foams: Linking Particle Deformation to Macroscopic Foam Structure"*
16:30	Coffee (coffee lounge)
	Session 4. Chair: Abhjith Prasad
17:00	Imaging and Engineering - *Alessandro Tengattini*
17:20	Imaging and Engineering Science Talk – *Isabel Antony, UCL, "Electrolyte Dynamics Observed via Operando Neutron Imaging"*
17:40	Disordered Materials – *Tom Headen*
18:00	Disordered Materials Science talk – *Ivan Klassen, The University of Manchester, "Absorption of gases in nanoconfined liquids studied by total neutron scattering"*
18:20	Free time
19:00 - 21:00	Student Dinner – Scarman – Courtyard

For arrivals on 13 April (for Science day on 14th)

18:00 – 18:45	**Registration – reception area at Scarman House**
19:00 – 21:00	Buffet Dinner – Scarman – Lakeview Restaurant, Section 1

Meeting Programme

Tuesday 14 April – Science Day

08:30	**Registration and coffee – The Slate**				
Plenary session – Slate 1 Chair: Lucy Clark (Birmingham)					
09:00	Welcome: Lucy Clark				
09:05	Plenary: Wuge Briscoe (Bristol): *Unravel hidden complexity at buried soft interfaces*				
09:35	Plenary: Kelly Morrison (Loughborough): *From thin films to polycrystals: Using neutrons to probe magnetic structure in functional materials*				
10:05	IoP/RSC Neutron Scattering Group Willis Prize presentation and talk chaired by Lucy Clark (IoP/RSC Neutron Scattering Group Chair)				
10:35	Coffee – Slate 2 – with meeting photo				
Parallel Sessions (individual breakout rooms)					
11.10– 13.10	**Energy & Functional Materials, Scarman Space: 41** Chairs: Phoebe Allan (Birmingham), Matthew Krzystyniak (ISIS)	**Magnetism & Superconductivity, Scarman Space: 24** Chairs: Chris Stock (Edinburgh), Vivi Pecanha Antonio (ISIS)	**Biosciences & Soft Matter, Scarman Space: 43** Chairs: Andrew Jackson (ESS)	**Molecular Systems and Catalysis, Scarman Space: 42** Chairs: Kathi Edkins (Strathclyde), Peter Fouquet (ILL)	**Engineering, Imaging and Cultural Heritage, Scarman Space: 29** Chairs: George Green (Oxford), Alessandro Tengattini (ILL)
11.10 – 11.40 Invited, 20 mins	Jan-Willen Bos (St Andrews): In situ studies of formation and stability of half-Heusler thermoelectric materials	Radu Coldea (Oxford): Emergent Excitations from Degeneracy in an Ising-Like Triangular Antiferromagnet	Adam Squires (Bath): New small angle neutron scattering approaches for soft matter	Camilla Di Mino (Oxford): Influence of Local and Intermediate Range Solvation on Liquids Macroscopic Properties	Juliet Spedding (British Museum): Without Scratching the Surface: Depth profiling compositional analysis of ancient Egyptian and Sudanese Faience
11.40 – 12.10 Invited, 20 mins	Sian Dutton (Cambridge): Structural Evolution in Electrochemically Desodiated NaxNiO2	Nicola Kelly (Cambridge): Exploring the Magnetic Stretched Diamond Lattice	Katherine Thompson (Birkbeck):	Iain Oswald (Strathclyde): Pressure-induced polymorphism of isonicotinamide	Muhammed Naeem (Birmingham): The Sequence Matters: Deformation Mechanisms in Metals
12.10 –12.30 Contrib, 15 mins	Cara Day (Cambridge): Investigating the average and local structure of lithium-proton exchanged LiNiO2 via combined neutron diffraction, nPDF, and spectroscopy	Nathan Bentley (Durham): Local magnetic properties of the rare-earth intermetallics RMn2Ge2 (R=Ce, Pr, Nd)	Elena Venturelli (Bristol): Resolving hydrophobic sex hormone encapsulation in Pluronic micelles using neutron scattering	Muhammad Arifuddin Fitriady (Glasgow): Ethene Hydrogenation over Pd/Al2O3 Catalyst: An Operando Neutron Imaging Study	Lucy Fitzgerald (Birmingham): SANS Characterisation of Precipitate Size Distributions in ODS Steels and Hardness Correlation
12.30– 12.50 Contrib , 15 mins	Abhijith Prasad (Bath): Innovative large scale hydrogen storage as clathrates in porous materials: A neutron study	Shruti Chakravarty (Birmingham): Magnetism in layered hexagonal perovskite ruthenates	Richard Thompson (Durham): Aggregations and adsorption of Soil Release Polymers	Abbie Madden (Strathclyde): Structure of water-dimethylformamide mixtures and its potential effect on crystallisation of pharmaceuticals	Scott Young (ISIS): Spectroscopic neutron imaging for chemically sensitive in situ electrolyte characterisation
12.50 – 13.10 Contrib, 15 mins	Mi Tian (Bath): Beyond Liquid Hydrogen: Neutron Studies of High-Density Confined Hydrogen in Nanoporous Carbons	Shiyu Deng (ILL): Ab-initio Investigation into the Origin of the Magnetic Excitation in Quantum Dimer Magnet Yb2Si2O7	Ruben Sakrabani (Cranfield): Evaluating role of biostimulants in mineralising nutrients in organo-mineral fertilisers using muonic X-Rays	Andrew McCluskey (Bristol): Lost in Translation: Simulation-Informed Bayesian Inference for Quasi-Elastic Neutron Scattering	Marianne Odlyha (Birkbeck): Making visible what is essential for the Preservation of Museum Collections , in particular organic-based Cultural Heritage objects

Meeting Programme

Tuesday 14 April – Science Day (Continued)

13.10	**Lunch – The Slate**				
	Parallel Sessions (individual breakout rooms) continued				
14.10 – 14.40 Invited, 20 mins	Rob House (Oxford): Neutron studies on redox, structure and diffusion in battery cathode materials	Gurinder Kaur (Edinburgh): Neutron Scattering Study of the Origin of Strong Magnetostriction in CoFe2O4"	Sebastien Perrier (Warwick): Reflecting on Soft Matter: Neutron Reflectometry to Investigate Polymer - Lipid Bilayer Interactions	Alex O'Malley (Bath): Molecular behaviours underpinning controlled drug release from zeolite materials.	Tom Ashton (UCL): Muography and Muonic X-Ray Tomography: Batteries and Beyond"
14.40 – 15:10 Invited, 20 mins	Josh Makepeace (Birmingham): Exploring catalytically-active solid solutions for ammonia synthesis and decomposition	Roger Johnson (Durham): Columnar ordered perovskites: Hybrid improper ferroelectricity, spin reorientation, and inverse melting	Andrew Parnell (Sheffield): Probing Peptidoglycan-Mediated Persistence in S. aureus Across Length Scales via SANS and SESANS	Joseph Wright (UEA): 'Probing the reactivity of hydrides at [FeFe]-hydrogenase subsite analogues'	Chloe Pearce (Goldsmiths Co): Non-Invasive Preservation Assessment of Archaeological Animal Bones by Complementary Imaging Techniques
15.10 – 15:30 Contrib, 15 mins	Adam Berlie (ISIS): Using muons to understand catalytic process in the heterogeneous catalyst Cu-SSZ13	Ben Huddart (Oxford): Studying spin diffusion and quantum entanglement using implanted muons	Tim Knowles (Birmingham): A Planar Double-Bilayer Model for Studying Gram-Negative Trans-Envelope Processes	Sam Lambrick (ISIS): Next Generation Vibrational Spectroscopy: VESPA and TOSCA+	Xingxhong Liang (Bristol): Non-Invasive Preservation Assessment of Archaeological Animal Bones by Complementary Imaging Techniques
15:30 – 15:50 Contrib, 15 mins	Saad Salman (Nottingham): Neutrons probe dynamics of ammoniates: Implications for solid-state batteries and hydrogen storage	Jonas Mikalauskas (Warwick): Evidence of an s + s-wave gap structure in the Kagome superconductor YRu3Si2	Edward Stuckey (Uppsala): Optimizing Experimental Set-Up for Soft Matter Reflectometry Experiments using HOGBEN	James Hallett (Reading): Uncovering structure and solvation in sustainable battery electrolytes	Adrian Hillier (ISIS): Elemental analysis on ancient coinage
15.50	Coffee – served outside each breakout room				
16.10 – 16:30 Contributed, 15 mins	Gavin Irvine (St Andrews): Fickian Diffusion measured by NPD and total scattering	Manisha Islam (Paul Scherrer Institute): Hunt for the supersolid phase in the Shastry Sutherland compound ErB4	Kangcheng Shen (Manchester): Domains Dictate Antibody Adsorption Architectures at Biocompatible Interfaces : Elucidation by QCM-D and Neutron Reflectometry	Miroslava Novoveska (UCL): Nanomaterials in the Liquid Phase Studied with X-Ray and Neutron Scattering	Simon McKendrey (Bristol): Measuring crack closure during operando fatigue crack growth using stroboscopic neutron diffraction
16.30 – 16:50 Contributed, 15 mins	Anthony Phillips (Queen Mary University of London): Barocaloric materials for green refrigeration: where does the entropy come from?	Paul Freeman (Lancashire): Addressing the Origin of the Hourglass Shaped Magnetic Excitations of La2-xSrxCoO4	Mona Sarter (ISIS): Interplay of structural and dynamical changes upon EDIII binding	David Lennon (Glasgow): The application of neutron scattering techniques to investigate the adsorption and reaction of 1-octene over H-ZSM-5 catalysts	Ali Siwji (Birmingham): Combined Imaging and Diffraction to Study Porous Materials under Hydrostatic Pressure
17:30 – 19:00	Poster session with refreshments - Lakeview Restaurant – Scarman House				
19:45	Conference dinner – The Slate				
16.00 – 18.00	**LENS Council meeting (invitation only)** Room: Space 25, Scarman				

Meeting programme

Wednesday 15 April – User Meeting

The Slate

Chair: Roger Johnson (Durham)	
09:00	Welcome: Roger Johnson
09.05	Updates from facilities: ILL – Ken Andersen, ILL Director
09.25	Updates from facilities: ESS – Giovanna Fragneto, ESS Science Director
09.45	Updates from facilities: ISIS – Sarah Rogers, ISIS Director
10.05	UKRI update (20 mins) – Roger Eccleston, STFC Executive Director for National Laboratories
10.25	Coffee
10.50	Plenary: Matt Rosseinsky (Liverpool): Discovery synthesis of inorganic functional materials in the digital age
11.20	Round table discussions: discussions in groups
12:20	Student poster prizes
12:45	Close
13:00	*Lunch – The Slate*

Practical information

The venue

The University of Warwick is situated four miles from Coventry City centre at the hub of the Midlands motorway network.

- Scarman, Radcliffe and The Slate are situated on the main University campus.
- If using a sat nav use post code CV4 7SH which will bring you to Scarman Road and then follow signs for Scarman, Radcliffe or The Slate
- Download further information from the website at: https://warwick.ac.uk/services/conferences/location/howtofindus/

Directions and travel

By car
The postcode for Radcliffe, Scarman and The Slate is CV4 7SH. This postcode directs you to Scarman Road. You'll need to follow signage to Lakeside Village, where you will find signposts for Radcliffe, Scarman and The Slate, which are all directly opposite to each other.

By rail
Coventry is on the West Coast Mainline and is serviced by regular trains, 7 days a week.

- Birmingham New Street (20 minutes)
- Leicester (62 minutes)
- London Euston (59 minutes)
- London Marylebone (1hr 40m)

There is a taxi rank at Coventry station and a single journey should cost between £10.00 to £15.00; however, prices may vary.

By bus
Local buses offer a frequent and convenient way of travelling to and from campus. There are regular bus services to the university campus from Coventry city centre and Coventry rail station, with the journey taking approximately 30 minutes.

For Scarman or Radcliffe please use 12X and disembark at the Bus Interchange.

Please visit the University of Warwick website for information on buses to the university from Coventry bus station (Pool Meadow) or Coventry rail station.

By air
Birmingham International Airport is approximately 20 minutes away and connects to many international cities. A taxi from the airport will cost around £30.00. London Heathrow, London Luton and London Stansted are all less than 2 hours away. East Midlands Airport is less than an hour away.

Car parking

Complimentary car parking is available at Scarman and Radcliffe for conference delegates. If these carparks are full, you may be redirected to an alternative car park on the University Campus.

Delegates will be required to **register in advance for free parking**. Please follow the instructions below:

1. Click on the following link: Warwick University Car Parks (apcoa.co.uk).
2. Fill in the 'Personal Details' and check that the 'Booking Summary' is correct.

Practical information

3. Select your arrival and departure date and time. We recommend that you allow extra time for arrival and departure, to ensure you have enough time for your parking needs, even if you are not parked for the entire period.
4. Use the promotional code: **PQADS** (this will reduce the price to £0.00).
5. Click 'Book now'.

Occasionally, the car parks at Radcliffe and Scarman are full. The nearest available car park is Kirby Corner Car Park (the registration is the same as above). Accessible parking spaces are available in all car parks for use by Blue Badge holders only.

Please refer to the map on page 5 for specific locations for each part of the NMSUM meeting.

Accommodation

Campus accommodation is split between Radcliffe and Scarman House. You will be emailed prior to the event to inform you which building you will be accommodated in.

These venues offer hotel-style ensuite bedrooms, including a study desk area, telephone, television, radio alarm clock, tea/coffee making facilities, hairdryer, fresh towels, toiletries and an iron/ironing board.

If there is anything else you may need then please contact Reception, who will be happy to help.

Rooms will be available from **15:00** on your day of arrival and check out is no later than **10:00.** You should check in at the reception desk for the building where your accommodation has been arranged.

Scarman and Radcliffe will be happy to store your luggage in their storage facilities if required. Please speak to a member of the Warwick team at Reception for assistance. Kindly note that there are no luggage storage facilities available in The Slate.

Breakfast will be served in the restaurant for the building where your accommodation is arranged and is available from **07:00 – 09:30.**

For those of you who are staying on Sunday night, please note that no dinner arrangements have been made. The bars at both Radcliffe and Scarman offer bar meals if you wish to have dinner at Warwick. You would need to pay for your meals but will be able to reclaim the cost (up to £25) via an expense claim.

Please note that all bars within the venue are cashless and will only accept card payment.

Wi-Fi

Wi-Fi is complimentary and can be accessed via the **Warwick Guest** network. Please check the details online or contact Reception.

Registration

Registration for the Student Day will be in the reception area at Scarman House from 10:00 am on 13 April.

For those arriving on the evening of Monday 13 April, registration will be at Scarman House from 18.15 – 18:45. For the rest of the event, registration will be in the foyer of The Slate. Please refer to the programme for registration timings.

Practical information

Claiming expenses

Travel expense forms can be emailed to attendees after the conference or are available on the ISIS website.

Please note that if you do not have a Facility User account, you will be asked to create an account before your claim can be processed.

Posters

For those who will bring posters, we kindly request that you bring this in **size A0 portrait**.
Velcro will be provided to attach your poster to a board.
Posters can be displayed from 3:00 pm on Tuesday 14 April and there will be a short window for individuals to attach their posters to the boards before the poster session starts.
Poster boards will need to be cleared that evening so please ensure that you take down your poster promptly at the end of the session.

Photography

Photos will be taken at the event and may be used online (website, social media), in print publications, talks and other media. Please speak to a member of the ISIS Reception Team if you would prefer not to appear in photos.

Alcohol

Due to UKRI rules, we are not able to provide or fund alcohol at this event. You can purchase your own alcoholic drinks from the bar in Scarman House, or the bar that will be open in The Slate during dinner.

Please be aware that all bars on the Warwick campus are cashless.

News from ISIS and ILL

ISIS User Charter

ISIS, in consultation with the ISIS User Committee, has produced a User Charter. Please provide any feedback on the Charter to the ISIS User Office.

Proposal deadlines

Details on ILL proposal deadlines can be found here.

The next ISIS proposal deadline is 20 April 2026. Details can be found here.
There will be no ISIS proposal call in October 2026 due to a planned long shutdown from April to September 2027. The next call for proposals after April 2026 will be April 2027.

Use of AI tools for writing proposals

ISIS has a policy on the use of generative AI tools for proposal and experiment report creation. Please review the policy before using these tools for your proposals.

Bring an undergraduate to an ISIS experiment

ISIS is keen to encourage the next generation of neutron and muon users. ISIS will cover the travel and subsistence costs for undergraduates from UK institutions to attend experiments; this is in addition to the normal experiment team. Find out more on the ISIS website.

Materials to help you talk about ISIS

If you're giving a talk that uses ISIS data, we have some resources online which may be useful. If there are other things you'd like to see on this page, contact Steph Richardson.

International partnerships

As well as long-term partnerships with Sweden and Italy, ISIS currently has funding to support researchers from Malaysia, Indonesia and Brazil. If you have collaborations with researchers from these countries and want to bring them to ISIS for an experiment, do contact Philip King at ISIS.

Latest on the ISIS Endeavour Programme

News on Endeavour, including the latest newsletter, can be found on the ISIS website.

Latest news from ILL

ILL's latest news can be found on the ILL website.

Phillips	George	University of Cambridge	**72**	**Lakeview**	Collinear Jahn–Teller Ordering Induces Monoclinic Distortion in “Defect-Free” LiNiO2 for Li-ion batteries
Pitcairn	Jem	University of Birmingham	**73**	**Lakeview**	Coexisting spin-liquid and spin-glass dynamics in the S = 1 cubic spinel, ZnV2O4, via rapid microwave-assisted solid-state synthesis
Plomp	Jeroen	Delft University of Technology	**102**	**Lakeview**	Delft Reactor Insititute, a new user facility
Radic	Alek	University of Cambridge	**74**	**Lakeview**	perovskite lattice dynamics measurement by helium atom and neutron scattering
Rajadhyax	Isha	STFC	**75**	**Lakeview**	Deuteration of biomolecules for neutron scattering and proton tunnelling research
Rohit	Asmita Girishbhai	Institut Laue Langevin (ILL)	**76**	**Lakeview**	Investigation of Hydrogen boil-off in Microporous Activated Carbons using Inelastic Neutron Scattering
Ross	Michael	STFC	**77**	**Lakeview**	The Synthesis and Deuteration of 1,2-Dimethoxyethane
Sarter	Mona	STFC	**11**	**Coffee lounge**	in-situ sample environment on IRIS
Sharma	Anurag	University of Southampton	**78**	**Lakeview**	N/A
Shrestha	Sujaya	STFC	**12**	**Coffee lounge**	Advancing Small-Angle Scattering Workflows in SasView: New Features and Enhancements for Usability, Reliability, and Scientific Productivity
Siwji	Ali	University of Birmingham	**79**	**Lakeview**	Combined Imaging and Diffraction to Study Porous Materials under Hydrostatic Pressure
Steele	James	University of Cambridge	**80**	**Lakeview**	Development of In Situ and Operando Neutron Powder Diffraction for Sodium-Ion Batteries using NaNiO2
Sulistiyo	Yudi	University of Glasgow	**81**	**Lakeview**	Inelastic Neutron Spectroscopy Investigation of Carbonaceous Materials as Candidate Phosgene Synthesis Catalyst
Suresh	Sneha	University of Bristol	**82**	**Lakeview**	Engineering pores in MOFs to enhance hydrogen storage

Posters

Sutton	Issy	University of Leeds	**83**	**Lakeview**	From Hydration to Association: Mapping Glycine Interactions in Ammonia-Water Mixtures using Neutron Scattering and Dissolve
Tellam	James	STFC	**107**	**Courtyard**	D2O Recovery Program
Tengattini	Alessandro	Institut Laue Langevin (ILL)	**111**	**Courtyard**	Neutron (and X-ray) Imaging at ILL
Thompson	Ben	STFC	**13**	**Coffee lounge**	Super MuSR - Progress and Developments
Thompson	Richard	Durham University	**84**	**Lakeview**	No Payne, Some gain! Structure, Dynamics and Rheology of Filled Rubbers
Tian	Mi	University of Bath	**85**	**Lakeview**	Beyond Liquid Hydrogen: Neutron Studies of High-Density Confined Hydrogen in Nanoporous Carbons
Tygier	Sam	STFC	**25**	**Coffee lounge**	Mantid
Venturelli	Elena	University of Bristol	**86**	**Lakeview**	Encapsulation of ultra-hydrophobic sex hormones with Pluronics for medical applications
Waite	Richard	STFC	**14**	**Coffee lounge**	Optimization with outliers using modified least-squares
Williams	Alan	Loughborough University	**87**	**Lakeview**	Neutron imaging of Medieval mail.
Winter	Anja	Keele University	**88**	**Lakeview**	Interplay of structural and dynamical changes upon EDIII binding
Xu	Jiuli	University of Warwick	**89**	**Lakeview**	Exploring the Mechanism and Application of Mixed Cyclic Peptide–Polymer Conjugates and Small-Molecule Conjugated Systems
Yokoyama	Koji	STFC	**90**	**Lakeview**	Muonium as a probe of point defects in type-Ib diamond
Young	Scott	STFC	**91**	**Lakeview**	Development of Spectroscopic Neutron Imaging towards Advanced Electrolyte Characterisation
Yu	Qian	The University of Bath	**92**	**Lakeview**	Behaviours of Dual-Metal MOFs in Neutron Experiments
Yu	Kai Ham	University of Birmingham / ISIS	**93**	**Lakeview**	Uniaxial stress device for high stress neutron diffraction
Zhang	Jingxin	University of Warwick	**94**	**Lakeview**	Cyclic Peptide–Polymer Nanotubes in Solution for Drug Delivery
